## The Ochils Festival

The Ochils Festival is a varied programme of events designed to celebrate the landscape, heritage and people of the Ochils and Hillfoots area of Clackmannanshire and Stirling.

There is something for everyone - locals and visitors alike! There are walks, talks, workshops, discovery sessions, tours of historic kirkyards and fun family activities. Each event helps to encourage a greater understanding and appreciation of this unique area.

The area includes rugged glens, rapid water flow, meandering streams, carseland, peaks, upland grazing, natural sponges, planted and ancient woodland. This spectacular landscape has directly contributed to much of the area's built and cultural heritage, including that connected with the textiles and mining industries.

## Grading of walks

The Ochils Landscape Partnership has followed the grading system implemented by the Ramblers. For more details on walk grading please see [www.ramblers.org.uk/go-walking/find-a-route/ramblers-routes-difficulty-ratings.aspx](http://www.ramblers.org.uk/go-walking/find-a-route/ramblers-routes-difficulty-ratings.aspx)  
Walks are graded as follows:

### Easy

Walks for anyone of a reasonable fitness level who doesn't have a mobility difficulty. Suitable for pushchairs if they can be lifted over occasional obstructions. Comfortable shoes or trainers can be worn. Paths are clearly identifiable on the ground.

### Leisurely

Walks for reasonably fit people with at least a little country walking experience. May include unsurfaced rural paths. Walking boots and warm, waterproof clothing are recommended.

### Moderate

Walks for people with country walking experience and a good level of fitness. May include some steep paths and open country, and may be at a brisk pace. Walking boots and warm, waterproof clothing are essential.

**Important.** Grades are provided as a general guide only: if you have any doubt about your fitness for a particular walk please contact the organiser. You should also bear in mind the distance of the walk, regional differences in terrain and the possibility of bad weather, which can make a walk more difficult than planned. Leaders may refuse to accept participants who in their opinion are inadequately equipped or unfit.

## Guided Tour of Alva Old Kirkyard

Alva Old Kirkyard is intriguing: there are the relics of St Serf's Church, interesting early gravestones and a plaque in memory of Dr Robert Erskine, who became Chief Physician to Tzar Peter the Great of Russia. This fine building contains the burials and memorials of many members of the Johnstone family through to the present day. It has been restored and recent repairs to the floor have revealed new information about its construction. This guided tour will illuminate the stories of the kirkyard and the many people buried there.

## The Tillicoultry Weavers' Strike of 1837

---

In 1837, while the better-known Glasgow Cotton Spinners' strike was raging in the west, the weavers of Tillicoultry were engaged in a bitter dispute with local mill owners, who were trying to force through a cut in wages. Following an attempt to introduce strikebreaking workers from other villages, Tillicoultry faced unprecedented trouble which led to the prosecution of some local men for 'riotous assembly'. Drawing on the evidence produced for the trial, Mark Nixon will describe what happened and place the Tillicoultry dispute within the wider picture of industrial relations and working-class politics in 19th-century Scotland.

## Guided Tour of Old Logie Kirk and Kirkyard

There has been a centre of worship at Logie since the 11th century, a fact which can be confirmed by the presence of two Norse hogback gravestones in the old kirkyard. Drop in for a guided tour of the highlights of the kirkyard, and look through the records in the small interpretive centre that has been set up in the original Watch Hut (once used to deter grave robbers).

## Hillfoots Geo-caching Competition

Geo-caching is an outdoor treasure hunting game - an excellent activity for all the family! The aim is to use GPS-enabled devices (or plain old paper if you prefer) to follow clues and discover caches (i.e. containers) hidden in the environment.

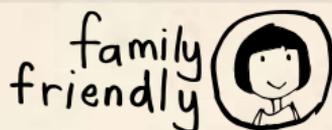

The Ochils Landscape Partnership has created our very own Geo-caching Trail in the Ochils and Hillfoots. We are also running a Geo-caching competition during June, with fantastic prizes to be won.

To help you get started we are hosting an Introduction to Geo-caching session during Ochils Fest on 15 June at the Dumyat Centre, Menstrie. We will explain the main aims and show you how to use GPS via your GPS device or Smartphone to find the caches. Don't worry if you don't have a GPS device or Smartphone as you can take away a paper-based version of our trail and join in just the same. You might even win a GPS device if you enter the competition! Prizes for the paper-based version of the competition include GPS, which will allow you to do the more high-tech version next time round!

Come and discover the unique caches and create your very own outdoor adventure!

**NB: This competition ends on 30 June 2013.**

## Join in our Volunteer Conservation and Environmental Monitoring Programmes

---

### The Ochils Landscape Partnership needs volunteers!

There are opportunities to take part in a wide range of activities, including tree and wildflower planting, path maintenance, and scrub and pond clearance.

You can also learn how to identify and record local flora and fauna, and take part in environmental surveying. We are looking for volunteers to help record data (text and photographs) on everything from butterflies, bees and beetles, to ancient trees and earthworms, and on air quality and water levels - and much more! This is all vital to protecting and improving our environment. These will be uploaded to [www.ochils.org.uk](http://www.ochils.org.uk) each month so you can track the changes across the seasons.

Training is available in conservation skills and wildlife identification. We have volunteer days midweek and at weekends.
